Re: United States Patent Application No. 10/631,853
Title: PERSONALIZABLE AND CUSTOMIZABLE
FEATURE EXECUTION FOR TELEPHONY USING
OPERATIONAL SEMANTICS...TREES
Assignee: Mitel Networks Corporation

Thank you, Examiner Wong, for our productive telephone interview yesterday. As promised, I enclose a set of draft claim amendments for your consideration (submitted without prejudice). You will note that I have proposed an amendment to claim 1 for reciting run-time execution of features, the observer node action, and the Permitted modality. Hopefully, this clarifies how feature interaction is avoided at run-time. Consequential amendments are proposed for claim 8, and I propose cancellation of claims 6 and 10 - 57 to reduce the issues under consideration. I hope that these proposals meet with your approval, and look forward to hearing from you regarding any additional amendments that may be necessary for this case to be allowed

Stephen J. Perry
Reg. No. 32,107
